

SQL Beginner to Guru

MySQL Edition

Overview of Northwind Database

What is the Northwind Database?

- The Northwind Database originally shipped with MS Access and later ported to MS SQL Server.
- Based on a fictitious company called Northwind Traders.
- Database has tables simulating a trading company.
- Contains tables for products, inventory, customers, vendors, etc.
- Provides a realistic database for generating real world SQL reports.
- Frequently used for training on Microsoft products.
